USB 1.1 Port Extender Kit

What does it do? - Ever had a keyboard, mouse, printer, wireless adapter, etc., that you wanted to have more than just a few feet from your computer? This extends the USB port up to 198 feet away.

Quality –We back each cable with our “100% Satisfaction Guarantee” – to help you buy with confidence. If it doesn't work for you, return it for a full refund. We only sell quality products and are willing to stand behind them.

Why would you need this?

Normally USB is only sustainable for 15ft. But say you have a video camera that connects through USB and you want to run it to a computer that is 100ft away. This kit will allow you to make that happen!

Current Markets and Applications:

- Remote keyboards and mice
