

November 23, 2009

Attention Valued USBFireWire Customer:

Congratulations on your purchase of the USB 2.0 to Ethernet adapter! Our adapter is very functional with many operating systems, including Windows XP, Windows Vista, including Vista 32-bit and Vista 64-bit, Windows CE, and Linux. Additionally, on most recent Windows operating systems, Windows update has the drivers ready for download, so there's not need to use the CD, or download the drivers from our website.

However, for those users who need drivers separately, please visit our website at <http://usbfirewire.com/unetwork.html>

We hope you enjoy your purchase!

Your business is greatly appreciated,

**Rick Wessley – Operations Manager  
and the [www.USBFireWire.com](http://www.USBFireWire.com) Team**

*Fun fact: It's physically impossible for you to lick your elbow.*
